

# INSTALLATION

**Slim and round tanks under 6,000 LT**

1. Tanks are required to be installed by a licenced plumber
2. Install tank on min 75mm concrete base 100mm larger in length and width than the tank
3. Allow 50mm clearance on all sides from fences, walls etc
4. Threaded fittings to be installed using Teflon tape - hand tight only. Be careful you do not damage the thread if using a brass tap/ball valve
5. 10 yr warranty does not cover disconnection, relocation and reconnection
6. Check relevant regulations relating to water tank installation with your local council
7. Please refer to Australian Standards Handbook HB 230-2006

Correct Installation will ensure warranty is in place
